**Please note:**

- Before upgrading to the latest version of TestArchitect, it is strongly recommended that you back up all repositories.
- A TestArchitect client and any repository server to which it connects must be of the same version.

# What's New in TestArchitect 8.2 Update 2

The following new features and improvements are introduced in the latest version of TestArchitect running under Windows.

## TestArchitect Client

- **Visual Studio Online beta support**
  - Both on-premise and cloud-based Team Foundation Server 2015 are now supported for integration with TestArchitect, along with Microsoft's on-premise and cloud-based Test Agent and Test Controller version 2013 update 5.
  - Basic authentication access methods to Visual Studio Online — **Alternate Authentication Credentials** and **Personal Access Tokens** — are supported. Note that authentication access with **OAuth protocol** is currently not supported.

## TestArchitect Automation

- **Support for mobile web automation on Safari running on iOS 9.0.x.**
- **Point-to-identify** is now available for controls on Android Chrome Enhancements to Device Live Screen now allow for the Interface Viewer's **Identification** tool to be used to identify and map UI controls in web applications running on Google Chrome on Android devices.

## Known Issues

- A personal access token, which is used to authorize access to Visual Studio Online, must be generated with the **All scopes** option selected. If **Selected scopes** is used instead, TestArchitect is unable to authorize access to Visual Studio Online, regardless of which scopes are selected.

## System Requirements

The following table lists the recommended hardware and software requirements for TestArchitect.

### Recommended system requirements

	<b>TestArchitect Client/Controller with small-scale Repository Server</b>	<b>Production-scale Repository Server (up to 15 concurrent connections, 1GB repository)</b>
<b>Operating system</b>	All Windows versions	Windows 2008/2012 Server
<b>RAM</b>	4 GB	8 GB
<b>HDD</b>	At least 2.5GB available space	Available space of at least 2 GB plus total aggregate size of all databases
<b>CPU</b>	2 GHz dual-core or faster	3.1 GHz quad-core
